Activity Sheets on Native Trees

How many of the Trees did you find on your walk? _____

All Trees have a crown which is made up of branches and leaves. The Trees anchor themselves by their roots in the soil. The trunk of the tree connects the crown and leaves with its roots to help absorb nutrients and water from the soil. The bark around the trunk helps protect the tree.

Name the different parts of the Tree and colour it in

Activity Sheets on Native Trees

Unscramble the names of these trees and see how many you can get right?
